

## GLOBAL RESCUE

*RECOMMEND AND USED BY  
NATIONAL GEOGRAPHIC and*

*We always purchase and highly recommend GLOBAL RESCUE. Safari Legacy offers MedJet, which is a competitor. They are fine, but don't offer all the things that Global Rescue does. We have several friends and clients who have had to use Global Rescue and they swear by it.*

*Under Safari Legacy you are automatically enrolled in Flying doctors. What they do is send out a doctor and then fly you to Nairobi. That's it. While good in the immediate aftermath of any illness or injury - you will want to get to a larger hospital in Europe or North America.*

*One of the best things about Global Rescue is that you will have 24/7 access to John Hopkins Hospital - so that you can get consultation and advice if any thing should arise and you just want to talk with a medical expert.*

*If extraction becomes necessary Global Rescue will send a team of medical personal who will personally accompany you in a flight back home to the hospital of your choice.*

*You can also purchase emergency evacuation if you so desire. You can read all about their very reasonably priced services here:*
