

Ground operator **SAFARI LEGACY**

Jan and James have been using Safari Legacy for many years and have become good friends of the owners and their staff. Their roots are deep in Africa (their families have been in East Africa for generations) and their goal is to fulfill your dreams of an exciting African safari.

Safari Legacy's founder, Chiman Patel, built their company over forty years ago and now his son Pratik Patel runs the company - as well as being an ardent conservationist who started a non profit NGO called African Wildlife Trust. He spends most of his time fighting to save Tanzania's elephants and rhinos.

Safari Legacy has offices in other countries including Kenya. Their entire team is passionate about Africa and their safari guides are among the very best Africa has to offer.

Safari Legacy specializes in natural history and wildlife safaris to some of the greatest wildlife destinations on earth including East and Southern Africa. With over forty years of experience, their goal is to provide a better understanding and appreciation for nature so that our earth's great natural wonders are preserved for the benefit of future generations.

*Safari Legacy was formerly known as Tanzania Photographic Tours and Safaris.
www.safarilegacy.com*

Jan and James have worked with Pratik on several conservatin projects to help fund his important conservation work.
